

Key Investor Information

This document provides you with key investor information about this fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this fund. You are advised to read it so you can make an informed decision about whether to invest.

IFSL Wise Multi-Asset Growth Class W Shares

A Sub-fund of the IFSL Wise Funds ICVC (ISIN Accumulation: GB00BD386X65)

This Fund is managed by Investment Fund Services Limited (IFSL)

Objectives and Investment Policy

The investment objective of the Fund is to provide capital growth over Rolling Periods of 5 years in excess of the Cboe UK All Companies Index and in line with or in excess of the Consumer Price Index, in each case after charges.

The Fund may have direct or indirect exposure to multiple asset classes including equities, fixed interest securities (government or corporate bonds), and indirect exposure to alternative asset classes, such as infrastructure, clean energy, commodities, property and private equity. Indirect exposure will be obtained through investments in closed-ended collective investment funds (such as investment trusts and REITs) and open-ended collective investment schemes (such as unit trusts, OEICs and ETFs) which may include those managed by the ACD and its associates (together 'collective investment vehicles').

The Fund may also invest directly in money market instruments, deposits, cash and near cash. The Fund's portfolio will be diversified by reference to various factors such as industry, geography or asset class, although there is no restriction on allocations between different factors.

The Investment Manager may also, where it considers appropriate, manage the portfolio on a more concentrated basis by holding fewer than 30 holdings. This could be, for example, where the Investment Manager decides to increase its backing of certain managers, thus reducing the tail of holdings, or during adverse market conditions where the Investment Manager may consider it in the best interests of Shareholders to allocate a greater proportion of the portfolio to cash.

The Fund may use derivatives to reduce risk or cost or to generate additional capital or income at proportionate risk (known as "Efficient Portfolio Management"). It is intended that the use of derivatives will be limited.

The Fund is actively managed. The Investment Manager aims to construct a portfolio of "best-in-class" collective investment vehicles and companies in asset classes that it expects to benefit from favourable market conditions, and at valuations which the Investment Manager considers are attractive at the point of purchase. This approach is research-intensive, and involves consideration of many factors in relation to both the wider economic environment and individual holdings. By focusing both on direct and indirect investments, research on each element of the portfolio benefits the other.

The Investment Manager is purposely using a broad investment universe as it

offers the best opportunity in seeking to achieve the Fund's objectives in an ever-changing world.

The Fund is managed to outperform the Cboe UK All Companies Index over Rolling Periods of 5 years. Given the objectives the index has been chosen as a target benchmark as shares of companies (equities) have historically been the fastest growing asset class over longer periods of time. The Fund is marketed solely into the UK and investors are predominantly UK based so a broad based UK equity index has been chosen. Whilst the index is comprised of shares in UK listed companies, a large proportion of their revenues comes from outside of the UK, making it a good proxy for UK investors looking for international exposure.

Please note the Fund is not constrained by or managed to the index.

The Fund is managed to outperform the Consumer Prices Index (the "CPI") over Rolling Periods of 5 years. The Fund aims to achieve a return for investors in real terms in line with the risk profile of the Fund. The CPI is a measure of UK inflation, and so is considered an appropriate measure of what constitutes a return in real terms for these purposes.

The Investment Association (IA), the trade body for UK investment managers, has created a number of 'sectors', as a way of dividing funds into broad groups with similar characteristics. Shareholders may wish to compare the Fund's performance against other funds within the Investment Association's IA Flexible Investment sector as this will provide an indication of how the Fund is performing compared to its peers in that sector. The IA Flexible Investment sector is considered an appropriate comparator because the Fund adopts a flexible asset allocation.

Income is not distributed but is rolled up (accumulated) into the value of your investment.

You can buy or sell all or part of your investment on any business day subject to the minimum holding requirements.

Recommendation: this fund may not be appropriate for investors who plan to withdraw their money in the short-term (within 5 years). The Fund should be viewed as a medium to long-term investment only.

Risk and Reward Profile

This indicator aims to give you a measure of the price movement of this share class based on past data. It uses historic returns over the last five years. If five years' data is not available, simulated data based on a representative portfolio are used.

Past data may not be a reliable indication of the future risk profile of the Fund. The risk category may change in the future and is not guaranteed. The lowest category does not mean risk free. The value of investments and the income from them may fall as well as rise and you may not get back the amount you originally invested.

This Fund has been measured as 6 because its investments have experienced high volatility in the past. The Fund's volatility is affected by various risks, including:

The Fund will be exposed to financial markets and market conditions can change rapidly. Prices can move irrationally and be affected unpredictably by diverse factors, including political and economic events.

The Fund may be exposed to the shares of smaller companies which are typically riskier than larger, more established companies. Difficulty in trading may arise, resulting in a negative impact on your investment. Shares in smaller companies may be harder to sell at a desired price and/or in a timely manner, especially in difficult market conditions.

The Fund may be exposed to emerging markets, which are typically riskier than more established markets, as they can involve a higher than average risk due to the volatility of currency exchange rates, limited geographic focus, investment in a

smaller number of issues, political and economic instability and less liquid markets. Difficulty in trading may arise, resulting in a negative impact on your investment.

The Fund may be exposed to bonds, the prices of which will be impacted by factors including; changes in interest rates, inflation expectations and perceived credit quality.

The Fund may have exposure to overseas markets, either directly or indirectly, and is therefore exposed to currency risk. As a result, the value of your investment can be affected by changes in exchange rates.

In certain market conditions, the Fund may not be able to sell one or more of its assets for the full value, or at all. This could affect the performance of the Fund and could cause the Fund to defer or suspend redemptions of its shares, meaning investors may not be able to have immediate access to their holdings.

A company that we deal with may renege on its obligations, costing the Fund money.

The Fund may enter into various financial contracts (known as derivatives) in an attempt to protect the value of the Fund's assets or to reduce the costs of investing, although this may not be achieved.

Operational processes, including those related to the safekeeping of assets, may fail. This may result in losses to the Fund, or inconvenience to investors.

Investors are encouraged to read the 'risk factors' section of the Fund's prospectus to find a more extensive list of the risks that apply to this Fund.

Charges

The charges you pay are used to pay the costs of running the Fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment. The entry and exit charges shown are maximum figures. In some cases you may pay less - you can find this out from your financial adviser.

The ongoing charges figure is based on expenses as at 29/02/2024. The ongoing charge calculation does not include where relevant, charges incurred by closed ended vehicles such as investment trusts. This figure may vary from year to year. It excludes:

- Portfolio transaction costs, except in the case of an entry/exit charge paid by the Fund retail scheme when buying or selling units in another collective investment undertaking.

For more information about charges, please see Section 7 of the Fund's Prospectus, which is available at www.ifslfunds.com.

One-off charges taken before or after you invest

Entry Charge	0.00%
Exit Charge	None

This is the maximum that might be taken out of your money before it is invested.

Charges taken from the fund over each year

Ongoing Charges	0.87%
-----------------	-------

Charges taken from the fund under certain conditions

Performance Fee	None
-----------------	------

Past Performance

Historic performance to 31 December 2023

	2014	2015	2016	2017	2018	2019	2020	2021	2022	2023
■ Fund	-	-	-	19.9	-4.1	14.8	12.1	16.7	-5.1	5.5
■ Benchmark	-	-	-	9.8	-13.4	14.2	-13.9	14.2	-1.7	3.6
■ Benchmark 2	-	-	-	3.0	2.1	1.3	0.6	5.4	10.5	4.0

Past performance is not a reliable indicator of future performance; the value of your investment and any income from it can go down as well as up.

Performance returns are based on the net asset value with distributable income reinvested and takes account of all ongoing charges, but not entry and exit charges. The past performance of this share class is calculated in GBP.

This Fund was launched on 01 April 2004.

This share class was launched on 9 December 2016.

Benchmark: Cboe UK All Companies.

Benchmark 2: UK Consumer Prices Index.
